What do we do?

MyPHI, the Health Information Exchange Platform

Our core technology, MyPHI, is a novel, HIPAA- and FERPA-compliant health information exchange platform entirely controlled by the user.

- With user authorization, our proprietary technology automatically accesses user data stored on diverse platforms (e.g., electronic health records, school records, health apps, or wearable devices).
- Data is intelligently summarized or organized into a synthetic document that users can seamlessly share with people of their choice. Users can also authorize MyPHI to automatically share data with anyone of their choosing.

How it works

With user authorization, our proprietary technology automatically accesses user data stored on diverse platforms (e.g., electronic health records, school records, health apps, or wearable devices).

Data is intelligently summarized or organized into a synthetic document that users can seamlessly share with people of their choice. Users can also authorize MyPHI to automatically share data with anyone of their choosing.

Our Mission

Our specificity is that we strive to be financially sustainable through innovative payment models that ensure free or low-cost access to data and technology for all community members. For every product, we design a value proposition whereby financially able organizations have an incentive to pay for patient-facing technologies that improve patient's health for the financial, health, social, and experiential benefit of all stakeholders.

Our Services

- Health Information Exchange Platform
- Data Analytics/Dashboard
- Vaccination Center
- COVID-19 Vaccine Hesitancy and Uptake Program

What is MyPHI?

MyPHI is a social impact enterprise with a mission to democratize access to health technology and data insights for the benefits of all communities, with a focus on low-income communities.

We are primarily a data sharing platform, gathering user data from diverse sources.

We have assembled a talented and highly motivated Team of Experts of complementary professional and social backgrounds who are all driven by the passion to improve individuals and communities lives through data insights and technology access.

Our specificity is that we strive to be financially sustainable through innovative payment models that ensure free or low-cost access to data and technology for all community members. For every product, we design a value proposition whereby financially able organizations have an incentive to pay for patient-facing technologies that improve patient's health for the financial, health, social, and experiential benefit of all stakeholders.

ABOUT US

Astrum Drive Technologies is an effort to reach the stars. Our mission is to get our people and our technology to the stars, to get our people and our technology to the stars, to get our people and our technology to the stars.

At Astrum Drive Technologies we merge science and technology. We are scientists, engineers, and we are working hard to make our mission a reality. We are working hard to make our mission a reality. We are working hard to make our mission a reality.

Our mission is to get our people and our technology to the stars. Our mission is to get our people and our technology to the stars. Our mission is to get our people and our technology to the stars.

EGO AUT VIAM INVENIAM AUT FACIAM AD ASTRA
To the stars, I will either find a way or make one

HELP US BUILD BETTER FUTURE

Whether you are considering an investment in Astrum Drive Technologies or you are already a shareholder, we are committed to providing you with the effective information you need to make informed, confident decisions about your investment in the Company. With you on our side we will continue to forge ahead.

We have already begun testing the groundwork, we patented the world first electrical powered rocket propulsion system which dramatically increases the range of the spacecraft and its cargo capacity. First astronauts in the world will be the person who enters asteroids, our technology is the first to allow that.

At Astrum Drive Technologies, we always have our sights set on the future. With our first firmly planted in the present. And our strategic objective has never been clearer. Lead the mankind to become a truly spacefaring civilization.

What is Dental Surgery?

Dental surgery is the surgery of jaw bones and teeth. Therefore, dental procedures or medical procedures that include artificial teeth. It includes the following procedures below.

Dental Surgery Procedures

1 Endodontic: This is a type of surgery involving the root of a tooth. A Root Canal & root canal surgery is an endodontic procedure in order to treat a diseased or damaged tooth by removing the infected tooth pulp and both root canal in order to relieve pain and save a tooth from extraction.

The infected tooth is drilled and has its pulp removed. Subsequently, a crown is placed atop the tooth. Infamous for its painless, however, modern endodontic is much more efficient and less painful than the old days.

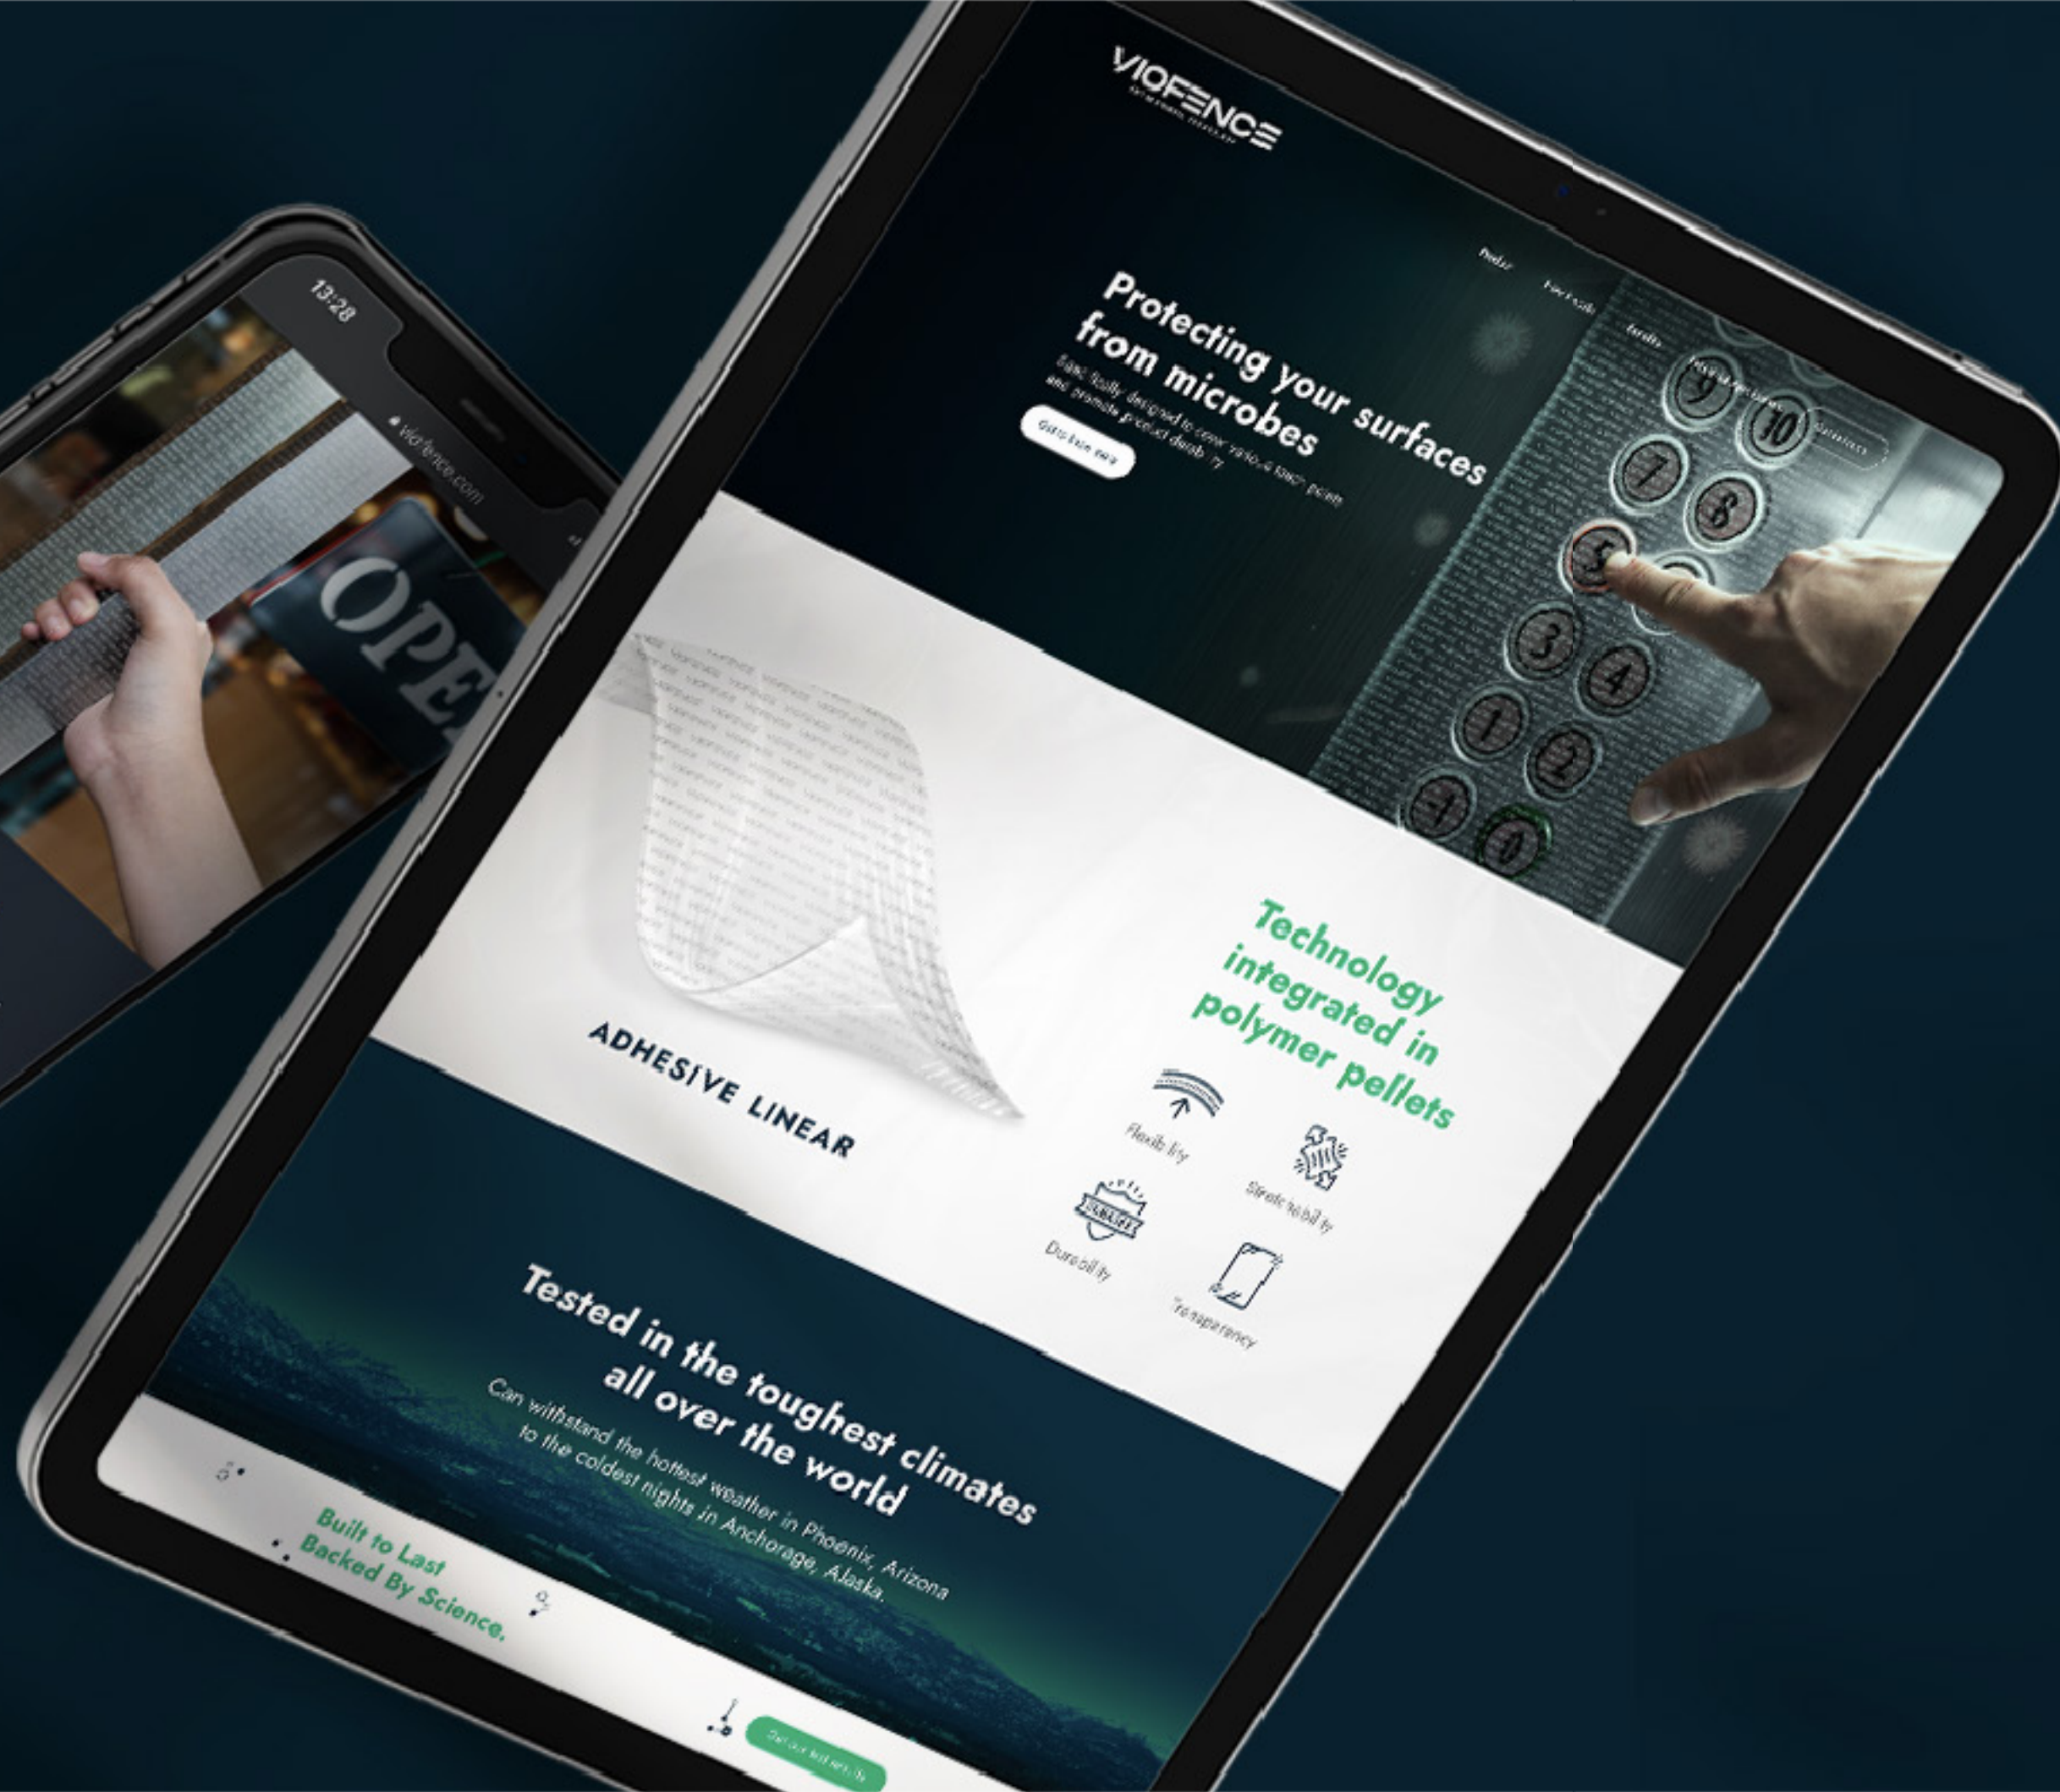

2 Pulpotomy: This is the precursor to a root canal procedure. This endodontic treatment is used in order to be more effective. It involves the disease.

This endodontic treatment is used in order to make living teeth preserve what's left. It is more easy to crumble and break.
